Data Warehouse and Data Mining Section: B

Unsupervised Learning: Cereal with 'vitamin' and 'rating' Data Set.

Submitted By, Name: Zaman, Wasif ID: 16-32027-2

Submitted To,
Rahman Mohammod Hafizur
Assistant Professor,
Department of Computer Science
American International University-Bangladesh

Description:

The data set here is about some cereals or morning breakfasts. The goal here is simply to cluster the breakfast items, find the correlation between them, and suggest preferable diets for people with particular cases

Attributes of thedataset:

- 1. 1st column: Name of cereal
- 2. calories: calories perserving
- 3. protein: grams of protein
- 4. fat: grams offat
- 5. sodium: milligrams of sodium
- 6. fiber: grams of dietary fiber
- 7. carbo: grams of complex carbohydrates
- 8. sugars: grams of sugars
- 9. potash: milligrams of potassium
- 10. vitamins: vitamins and minerals -0, 25, or 100, indicating the typical percentage of FDA recommended
- 11. shelf: display shelf (1, 2, or 3, counting from the floor)
- 12. rating: a rating of the cereals (calculated by Consumer Reports)

Source of Dataset:

(With 'vitamin' and 'rating' columns): 77 x 11 here: http://www.cs.umd.edu/hcil/hce/examples/cereal/cereal-updated.txt Dataset:

Question Answers:

1. Is a strong correlation between dietary fiber and potassium?

Answer:

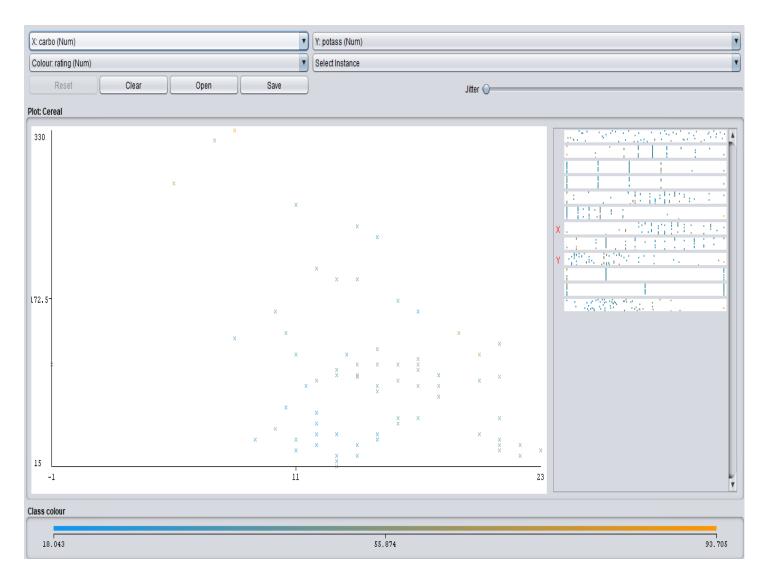

There is a strong linear correlation between fibers and potash. If one is increase/decrease the other one also increased/decreased proportionally.

2. Are groups of cereals from which we can choose according to our preferences? **Answer:**

Туре	Cluster No	Reason
Pregnant women	2,12,14,16	High fiber, High protein, high Calories.
High Pressure	7,8,10,12,13	Because of law sodium and fat
Low Pressure		Should take food containing High sodium, high fiber, moderate fat
Diabetes	1,2,7,10,12,13,14	Needs to avoid sugar.

3. Seeothercorrelation between the data given in the files.

Answer:

Here majority of the data indicates that complex carbohydrate is inversely proportional with potassium but not vice versa. That means when quantity of complex carbohydrate rises, potassium quantity decrease.
